(73) Assignee: **Koyokizai Co., Ltd.**

A blind bolt and a blind nut system wherein the blind bolt comprises a bolt main body having an oblong hole and a locking piece rotatably supported within the oblong hole. The locking piece is provided with a pair of rotary protrusions and a pair of pieces holding rotary protrusions projecting outwardly. The oblong hole includes a pair of rotation supporting grooves to accommodate the rotary protrusions and support rotary motion, and a pair of piece holding grooves to accommodate the piece holding the piece holding protrusions.
